

## MULTI-LOCK LOCKING BAR

### Multi-Point Locking Design

Red inner slide bar interlocks with specially designed locking lug hinge at each drawer opening when in the locked position. This multiple point locking principle eliminates torque on the bar usually found in devices that lock at the top and bottom position only.

### Spring-Open Action

A slight upward motion of the red inner slide bar releases all lock points, permitting the built-in spring-loaded hinge to swing bar clear of drawer openings. Engineered to give sufficient clearance for unrestricted access to adjacent files when locked or unlocked.

### No Storage—Accident—Damage Problem

Since Multi-Lock bars become an integral part of the file and swing clear of drawer openings, they solve the problem of storing heavy, dangerous bars in the office.

### Simple Installation

Multi-Lock can be installed without opening the file or disturbing its contents — in a matter of minutes. Can be installed with blind rivets or with sheet metal screws provided.

1. Drill upper screw hole (#20 or .161 diameter) 2 $\frac{3}{8}$ " down and  $\frac{1}{4}$ " over from upper drawer opening.
2. Insert and set screw to hold bar in place.
3. Use hinge as locators for other holes.
4. Drive screws home while keeping hinges firmly in place against file.
5. Slide bar can be reversed to permit installation on either right or left side of file. Normally supplied for left side installation.

### Specifications

Constructed of heavy 16-gauge formed steel. Inner steel bar finished in red to easily indicate locked or unlocked position. Both inner and outer bar are finished in powder coat acrylic enamel. All hinges are locking lugs of 16-gauge steel. #6 x  $\frac{3}{8}$ " truss Phillips-head self-tapping screws supplied.

### Ordering

Catalog Number	Length	Number of File Drawers
MLK-1	11"	1
MLK-2	21 $\frac{1}{2}$ "	2
MLK-3	33 $\frac{1}{2}$ "	3
MLK-4	45"	4
MLK-5	56"	5
