DL4100 Mortise Deadlock

Corbin Russwin Introduces DL4100 Mortise Deadlock

Corbin Russwin is pleased to introduce the DL4100 mortise deadlock. This new deadlock replaces the DL4000 series offering. Designed for safety and security, this new series features a laminated stacked steel deadbolt, with a hardened steel insert. Available with Corbin Russwin conventional and Pyramid cylinders, the DL4100 is ideal for institutional and educational applications, and is UL listed for use with fire rated doors.

Features:

- Laminated stacked steel deadbolt with hardened steel insert and a 1" throw
- 1-3/4" door thickness standard; additional door thicknesses available
- 2-3/4" backset
- Available to accommodate flat or beveled-edge doors
- Pyramid cylinders optional
- UL listed for use with 3 hour Fire Rated doors

The DL4100 series deadlocks do not retrofit with the current DL4000 series. Templates are available on the Corbin Russwin website, as well as in the product's packaging.

The DL4100 Series is currently available for order. Initial delivery is approximately six weeks. For product pricing, please refer to the Price List dated June 15, 2011.

The DL4000 series deadlocks will remain available for ordering until June 30, 2012. After this date, replacement parts will remain available until June 30, 2013.
